***Detailed Action***

***Examiner's Amendment***

1. In Claims 1,4,7-10,13-19,21-23 and 25 please replace "(previously amended)" with "(currently amended)".

***Allowable Subject Matter***

2. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art to Lewit et al fails to teach the claimed weight per unit area of the nonwoven fabric. Lewit et al teaches that to avoid having the foam penetrating into the reinforcing fabric layer, either the nonwoven fabric is made of sufficient thickness to achieve this effect, or additional layers of the nonwoven fabric would have to be employed (Col 4, lines 44-50). However, from this disclosure it is not obvious to use the nonwoven wt range as claimed by Applicant. Additionally, Lewit et al teaches away from using a light weight nonwoven as penetration of foam into the reinforcing fabric layer would not have been readily prevented. Applicant also points out that unexpected results are associated with the use of a nonwoven fabric having the claimed basis weight as discussed on pp.8 of the Remarks filed 7-22-04.

***Conclusion***
